

Top 10 Benefits of Artificial Turf

The age-old expression, “The Grass Is Always Greener on the Other Side of the Fence” is only true if your neighbor has artificial turf instead of seeded grass. Not only is artificial turf greener, it also has a lot of other qualities that make it a popular substitution for authentic grass.

Benefits of Artificial Turf:

- No Water Necessary
- Safe for Pets and Humans
- Durable for Dogs and High Traffic
- Long-Term Cost Savings Benefits
- Looks Great All Year
- Looks and Feels Like Natural Grass
- No Mud
- Environmentally Safe
- Reduces Harmful Fertilizers and Pesticides
- Versatile Products that Solve Many Design Challenges

In an effort to be cost-conscious, environmentally friendly, and keep the grass stains off the knees, more people are turning to artificial turf. In these hectic days and times where it seems the work day never ends and children around the neighborhood are hustling from one sport to the next, the time we take to manicure our lawns is dwindling. We live in an ecofriendly environment where many people are trying consciously to preserve nature and limit the exposure to unnecessary pesticides and fertilizers. An artificial turf installation by Estate Greens is the best choice for ensuring your grass, the environment, and your wallet stay green.

Why install artificial turf?

The reasons are endless! Here is our list of the 10 most popular benefits.

1. No Water Necessary

Made to work with composite sand, this artificial turf never needs to be watered as natural lawns do. And the harsh extreme heat does not cause you to have to spend more money watering during the dry months, saving vast amounts of water and preserving our natural resource.

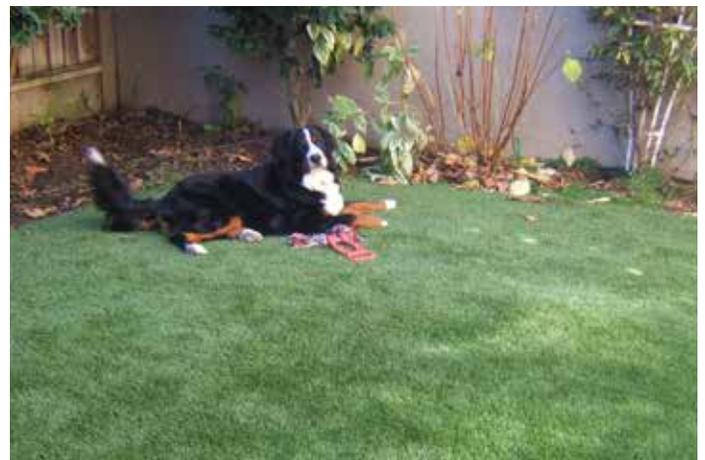

2. Safe for Pets and Humans

Made from the same material as carpet, the poly and nylon yarn fiber material is under strict industry standards. Pets and humans alike can play safely on this surface without any fears to our loved ones' health.

3. Durable for Dogs and High Traffic

Go ahead and throw the ball to Rex over and over again. Let him do puppy laps, race around the yard, and play tug of war to his heart's content. Invite the neighborhood kids over for a friendly game of soccer. Adults, kids, and pets will be able to play on our durable turf for years to come.

4. Long-Term Cost Savings Benefits

There is no need to pay a gardener to mow the lawn, apply additives, replace sprinklers, or reseed the lawn. With the lack of maintenance costs, artificial turf saves you money every month. Take your savings and treat yourself to something special.

5. Looks Great All Year

Green year round, you do not have to worry if your grass is going to brown in the summer heat, freeze in the winter or die while you are on vacation. Your neighbors will be crazy with envy trying to make their grass look half as good as yours does.

6. Looks and Feels Like Natural Grass

Artificial turf is the closest look and feel to natural grass as you can get. Soft blades colored grass- green allow you the benefit of natural grass without the allergies or grass stains.

7. No Mud

There is no need to worry about the kids, friends, and your pet dragging unsightly and messy mud into the house.

With no dirt beneath the blades, dirt is eliminated for good.

8. Environmentally Safe

Estate Greens cares about the environment. There is no need to worry about toxic materials in our artificial turf. We are environmentally safe, non-toxic, and green in every sense of the word.

9. Reduces Harmful Fertilizers and Pesticides

Estate Greens prides itself in eliminating fertilizers and pesticides not only from our turf, but also from the storm drains from the runoff from natural grass. Our product is maintenance free, eliminating the need for harmful chemicals.

10. Versatile Products that Solve Many Design Challenges

Artificial turf is the perfect answer to your designing questions. No need to wonder if the plant needs sun or shade or if can tolerate high-traffic areas. Sunburst Landscaping is the perfect complement to your design challenges. Added among pavers, walkways, stones, and driveways, Estate Greens is a source of beauty.
